ABOUT KEST DOOR

Founded in 2001, KEST DOOR is a leading manufacturer specializing in cast-aluminum doors, with over 25 years of dedicated experience in the industry. Headquartered in China, the company operates a 60,000-square-meter production facility with an annual manufacturing capacity of 30,000 sets of cast-aluminum doors.

KEST Door's strength lies in its people and its commitment to innovation. The company employs a team of 1,000 staff, 15% of whom are dedicated R&D professionals, driving continuous technical advancement and product development. This investment in innovation has resulted in hundreds of patents covering door patterns and structural designs, enabling KEST DOOR to offer distinctive, high-quality, and fully customizable cast-aluminum door solutions for villa entrances, security applications, and interior spaces.

Domestically, KEST DOOR has built a nationwide sales network of more than 800 authorized dealers across China. Internationally, the company exports to markets worldwide, achieving an annual export volume of approximately US $100 million, and serves architects, property developers, importers, distributors, and hospitality and commercial buyers seeking reliable, project-ready door systems.

Quality is central to KEST Door's operations, underscored by its ISO 9001 Quality Management System certification, ensuring consistent product quality and manufacturing excellence at every stage of production.

Combining decades of craftsmanship, strong R&D capability, extensive patent protection, and a broad distribution network, KEST DOOR continues to position itself as a trusted global supplier of premium cast-aluminum door solutions.

60,000 m² Production Facility	**30,000** Sets Annual Capacity
1,000+ Staff & Engineers	**15%** R&D Professionals
800+ Authorized Dealers	**$100M** Annual Export Volume

MISSION

To carry the connecting power we mastered in the virtual world into every real door — so that each threshold crossed leads to a choice taken seriously.

VISION

To become a globalized door brand that bridges the virtual and the real — bringing the world closer with every crossing, and making the door a true gateway to tomorrow.

CORE VALUES

A swipe on screen costs nothing, but the choice behind a door carries trust and responsibility. Our values exist to be worthy of that different weight.

KD-SLS60 (2024)

Built-in intelligent AI assistant

1. These smart locks support automatic identification within 2-4 meters and contact-free auto-unlocking from 0.8-2 meters.
2. Adopts the same 24GHz millimeter-wave radar as Tesla, delivering the same precision sensing and automatic recognition as in Tesla vehicles.
3. Proprietary patented technology, winner of the Red Dot: Best of the Best Award (Germany).
4. Built-in intelligent AI assistant delivers gentle reminders and warm greetings, letting you feel the warmth of home every time you unlock the door.

24GHz millimeter-wave radar

4th Generation Remote Sensing Recognition Technology

Precise Identification | Dynamic Motion Perception | Approach-to-Unlock

Recommended Smart Locks (Cervin Series)

Noble as a Stag, Secure as a Cervin.

Red Antique Copper

KD-SLY90-R

Gunmetal Grey

KD-SLY90-G

1. Two independent unlocking systems: electronic unlocking and mechanical password unlocking.
2. The chip and mainboard of this smart lock are sourced from STMicroelectronics.
3. It achieves IP68- level water resistance, so it can be safely installed outdoors.
4. Our company holds independent intellectual property rights for this smart lock.

1. This smart lock integrates an independent mechanical password lock with security standards equivalent to those of mechanical safes.
2. No more concerns over lock-out situations or misplacing spare keys.

1. High-definition large screen equivalent to a 5.5-inch smartphone display.
2. 235° fisheye lens with VR-grade panoramic monitoring capability.

1. This smart lock adopts an innovatively independently-assembled architecture for electronic modules, which greatly facilitates customer installation and operation.
2. No complicated wiring; only the faulty module needs replacement, substantially cutting dealers' maintenance time and costs.
